

PAUL RYAN A. DEDUMO

QA ENGINEER | SOFTWARE TESTING | TEST AUTOMATION

Calamba City, Laguna | +63 998 595 6693 | pauldedumo@gmail.com | linkedin.com/in/ryandedumo

PROFESSIONAL SUMMARY

QA Engineer with 10+ years of experience in software quality assurance and engineering across enterprise web applications, Android mobile platforms, and automotive embedded systems. Experienced in test planning, manual and automated testing, functional, integration, regression, smoke, exploratory, UAT, deploy-rollback, API, and cross-browser/device validation. Strong background in defect lifecycle management, Agile delivery, CI/CD, and automation using TypeScript, JavaScript, Python, PyTest, Jenkins, and GitHub Actions. Skilled in Postman, JIRA, BrowserStack, TestRail, Power BI, and embedded engineering tools.

EXPERIENCE

QA Engineer | UJET (Remote) | Jun 2024 - Present

- Own end-to-end QA for assigned features, including requirements review, test planning, test case design, execution, defect management, and release readiness.
- Author and maintain test plans and test suites in Confluence/Notion and TestRail/BrowserStack, keeping QA documentation consistent through tooling transitions.
- Execute functional, integration, smoke, sanity, regression, UAT, and deploy-rollback testing across web applications and Android mobile platforms.
- Perform cross-browser and cross-device validation through BrowserStack to verify consistent behavior across browser, OS, and device combinations.
- Report, triage, prioritize, and track defects in JIRA through resolution, maintaining a tight feedback loop with developers and cross-functional stakeholders.
- Design and maintain automated tests, including migration of an internal legacy JavaScript test suite to a more maintainable TypeScript framework.
- Perform backend validation and API testing with Postman, validating REST services, JSON payloads, and third-party integrations.
- Support CI/CD and continuous testing through Jenkins pipelines and GitHub Actions; participate in sprint planning, reviews, and retrospectives.

Firmware & Embedded Engineering Specialist | Accenture, Inc. | Feb 2023 - Jun 2024

- Set up remote testing environments and led automation strategy for automotive infotainment systems.
- Rewrote Android VTS test cases in PyTest to improve maintainability, reliability, and execution efficiency.
- Built Power BI dashboards to track bug trends, resource allocation, and software quality indicators for engineering leads.
- Executed unit, non-functional, endurance, and performance testing for automotive software.

Application Developer Senior Analyst | Accenture, Inc. | Sep 2019 - Feb 2023

- Troubleshoot testing environments and wrote automation scripts that reduced repetitive manual testing and supported faster regression cycles.
- Validated system models against source code and created test designs for model-based software.
- Reviewed automated test results, investigated discrepancies, and supported delivery of high-quality releases.

Application Developer Analyst / Associate | Accenture, Inc. | Jan 2016 - Sep 2019

- Performed white-box and black-box testing to verify application source files against client requirements.
- Built custom JIRA workflows, project keys, and permission schemes to support project operations and defect management.
- Supported Agile teams with resource allocation, productivity reporting, and project distribution activities.
- Created internal automation and time-tracking tools using Jenkins and Excel VBA macros.

TECHNICAL SKILLS

Testing: Manual Testing, Test Planning, Test Case Design, Functional, Integration, Regression, Smoke, Sanity, Exploratory, UAT, Deploy-Rollback, API Testing, Cross-Browser/Device Testing, Android

Automation & Languages: TypeScript, JavaScript, Python, PyTest, Robot Framework, Embedded C

Test Management & Collaboration: JIRA, TestRail, BrowserStack, Confluence, Notion, Slack

CI/CD & Source Control: Jenkins, GitHub Actions, GitHub

Embedded & Engineering: MATLAB, Simulink, Automotive Infotainment Testing

Data & AI: Power BI, Excel VBA, Claude AI

EDUCATION

Bachelor of Science in Electronics and Communication Engineering | University of San Carlos | Cebu City
