Transferable Strengths: Data Validation, Attention to Detail, Problem Solving, Organization, Adaptability, Fast Learner

PROFESSIONAL DEVELOPMENT

Remote Sales Training | *Parliament+* | *In Progress*

- Training focused on prospect engagement, cold outreach, lead qualification, appointment setting, and foundational prospect research.
- Developing a consultative approach to prospect conversations, qualification, and professional follow-up.

PROFESSIONAL EXPERIENCE

QA Engineer | *UJET (Remote)* | *Jun 2024 - Present*

- Work with product, engineering, and cross-functional stakeholders to understand requirements, clarify expectations, and communicate issues clearly.
- Investigate product and backend discrepancies, validate findings across multiple data sources, and document results in a structured, actionable format.
- Manage multiple priorities across feature testing, defect follow-up, release readiness, and remote team communication.

Firmware & Embedded Engineering Specialist | *Accenture, Inc.* | *Feb 2023 - Jun 2024*

- Collaborated with technical teams to understand requirements, investigate complex problems, and communicate findings to stakeholders.
- Built automation and reporting solutions that improved efficiency, organization, and visibility into engineering work.

Application Developer Senior Analyst | *Accenture, Inc.* | *Sep 2019 - Feb 2023*

- Analyzed requirements, investigated application and testing issues, and followed discrepancies through resolution.
- Communicated technical information in a clear, structured manner while working with distributed teams and stakeholders.
